INITIAL FEES (excl. VAT)	A CLASS	T CLASS	X CLASS	B CLASS
Prudential	0.00%	0.00%	0.00%	0.00%
Financial adviser (if applicable)	2.75% (max)	2.25% (max)	2.75% (max)	0.00%

ANNUAL MANAGEMENT FEES (excl. VAT)	A CLASS	T CLASS	X CLASS	B CLASS
Prudential**	1.25%	0.80%	1.00%	0.60%
Financial adviser service fee (if applicable) ***	0.50%	0.00%	0.50%	0.00%

** The Fund can invest portions of its assets into underlying foreign investments (incl. investments into Africa). This would mainly be achieved by investing into the sub-funds of the Prudential Global Funds ICAV and the Prudential Africa Equity Fund. These funds will charge an additional asset management fee which is included in the Fund's NAV and the Fund's TER. The Manager receives a marketing and distribution fee in respect of the Prudential Global Funds.

*** Included in Prudential's annual management fee above (T Class Financial Adviser Fees: Initial and Ongoing Adviser Fees are negotiated between the Investor and Financial Adviser. Should you agree to an ongoing Adviser Fee, this will be paid via the regular repurchase of units)

EXPENSES (incl. VAT)	A CLASS	T CLASS	X CLASS	B CLASS
Total Expense Ratio (TER)	1.66%	1.15%	1.38%	0.92%
Transaction Costs (TC)	0.09%	0.09%	0.09%	0.09%
Total Investment Charges (TIC)	1.75%	1.24%	1.47%	1.01%

Where a transaction cost is not readily available, a reasonable best estimate has been used. Estimated transaction costs may include Bond, Money Market, and FX costs (where applicable).

RISK/RETURN PROFILE:

FUND OBJECTIVE:

The primary objective is to outperform CPI by 5% before fees (which is 3.4% after fees for the A class) over a rolling 3-year period. The secondary objective is to reduce the risk of capital loss over any rolling 12-month period.

INVESTOR PROFILE:

Individuals looking for a low-to medium-risk multi-asset fund. Individuals and retirees who want to protect their investment from the detrimental effects of inflation over time. The recommended investment horizon is 3 years or longer.

INVESTMENT MANDATE:

The Fund invests in an actively managed, diversified combination of domestic and international assets where the asset allocation is tactically managed. The intended maximum limits are Equity 40%, Listed Property 25%, Foreign 30%, and Africa (excl. SA) 5%. The Fund is managed to comply with regulations governing retirement fund investments (Regulation 28).

FUND MANAGERS:

David Knee, Michael Moyle and Johny Lambridis

ASISA CATEGORY:

South African - Multi-Asset - Low Equity

OBJECTIVE (BEFORE FEES):

CPI+5% p.a. over a rolling 3-year period

INCEPTION DATE:

1 June 2001

FUND SIZE:

R32 578 074 540

AWARDS:

Raging Bull: 2013
Morningstar: 2015

INCOME DISTRIBUTIONS	TOTAL DISTRIBUTIONS	12-MONTH YIELD
(A Class) 30 June 2018	5.15 cpu	2.32%
(A Class) 31 December 2017	4.00 cpu	2.39%
(B Class) 30 June 2018	6.60 cpu	3.04%
(B Class) 31 December 2017	5.44 cpu	3.07%
(T Class) 30 June 2018	6.15 cpu	2.82%
(T Class) 31 December 2017	4.99 cpu	2.87%

If the income earned in the form of dividends and interest exceeds the total expenses, the Fund will make a distribution. (cpu = cents per unit)

FUND COMMENTARY

Global equity markets reversed some of their losses in the last week of November following renewed optimism towards risk assets. News that the US would hold off imposing further tariff increases on Chinese imports for 90 days was arguably the primary driver behind investor sentiment, coupled with the prospect of the US Federal Reserve possibly paring back further interest rate hikes - the comments came on the back of economic data which pointed to a possible deceleration in economic growth and inflation. In the UK, Brexit concerns continued to weigh on the market, with Prime Minister Theresa May's exit strategy in danger of being rejected by Parliament and spreading further uncertainty. In more positive news, the Italian government and the EU moved closer to reaching a consensus over Italy's budget deficit - an issue that has weighed on European markets in recent months.

Despite inflation coming in at 5.1% y/y for October (as expected), the SARB decided to increase its benchmark lending rate by 0.25 percentage points to 6.75%, citing long-term inflationary pressure as the main catalyst behind the decision. This lent some support to the rand and bonds, demonstrating the SARB's intent to rein in inflationary expectations around the 4.5% midpoint of its target band. Global ratings agency S&P announced that it would keep South Africa's foreign-currency and local-currency credit ratings at below investment grade due to concerns over the country's fiscal prospects and debt burden; however, its stable outlook made the prospects of a further near-term downgrade unlikely. Eskom, meanwhile, announced nation-wide electricity outages due to a sharp decline in coal stockpiles at five of its power stations. South African equities missed out on the risk-on sentiment as a string of poor economic data, a stronger local currency and rising interest rates weighed on the local bourse, with the FTSE/JSE All Share Index returning -3.2% in November. The BEASSA All Bond Index returned 3.9%, inflation-linked bonds (the Composite ILB Index) delivered -1.1%, and cash as measured by the STeFi Composite Index returned 0.6%. Listed property posted a -1.3% return. Looking at global market returns (all in US\$), the MSCI All Country World Index returned 1.5% for the month, the Bloomberg Barclays Global Aggregate Bond Index delivered 0.3%, while the EPRA/NAREIT Global Property Index produced 3.5%. The rand gained 6.9% against the US dollar, 6.8% against the euro and 7.1% against the pound sterling.

Contributing the most to absolute performance for the month was the fund's exposure to SA bonds (excluding inflation-linked bonds) and SA cash, while exposure to SA and foreign equities (excluding property) detracted the most from value. Although foreign equities detracted from performance, this was mainly due to rand appreciation relative to the US dollar.

GLOSSARY

12-month yield	A measure of the Fund's income distributions as a percentage of the Fund's net asset value (NAV). This is calculated by summing the income distributions over a rolling 12-month period, then dividing by the sum of the NAV at the end of the period and any capital gains distributed over the same period.
Annualised performance	The average amount of money (total return) earned by an investment each year over a given time period. For periods longer than one year, total returns are expressed as compounded average returns on a yearly basis.
Cumulative performance graph	This illustrates how an initial investment of R100 or N\$100 (for example) placed into the Fund would change over time, taking ongoing fees into account, with all distributions reinvested.
Income distribution	The dividend income and/or interest income that is generated by the underlying Fund investments and that is periodically declared and distributed to investors in the Fund after all annual service fees.
Information ratio	Measures the Fund's active return (Fund return in excess of the benchmark) divided by the amount of risk that the manager takes relative to the benchmark. The higher the information ratio, the higher the active return of the Fund, given the amount of risk taken and the more consistent the manager. This is calculated over a 3-year period.
Intended maximum limits	This indicates the Fund's intended maximum exposure to an asset class. These limits may be reviewed subject to the Fund's Supplemental Deed and/or Regulation 28 for those Funds managed in accordance with Regulation 28 of the Pension Funds Act.
Maximum drawdown	The largest drop in the Fund's cumulative total return from peak to trough over any period.
Monthly volatility (annualised)	Also known as standard deviation. This measures the amount of variation or difference in the monthly returns on an investment. The larger the annualised monthly volatility, the more the monthly returns are likely to vary from the average monthly return (i.e. the more volatile the investment).
Percentage of positive rolling 12 months	The percentage of months, since inception, that the Fund has shown a positive return over a rolling 12-month period.
Regulation 28	The South African retirement fund industry is governed by the Pension Funds Act, No 24 of 1956. Regulation 28 of the Pension Funds Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in.
Sharpe ratio	The Sharpe ratio is used to measure how well the return of an asset compensates the investor for the risk taken. The higher the Sharpe ratio the better the Fund's historical risk-adjusted performance has been. This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the standard deviation of the Fund's returns. This is calculated over a 3-year period.
Sortino ratio	This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the downside deviation of the Fund's returns i.e. the "bad" volatility. A high Sortino ratio indicates a low risk of large losses occurring in the Fund. This is calculated over a 3-year period.
Total Expense Ratio (TER)	This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over a rolling three years (where applicable) and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
Transaction Costs (TC)	The percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.
Total Investment Charges (IC)	The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expenses, these costs (the TER, TC & IC) should not be deducted from the fund returns.
Unit class	Prudential's funds are offered in different unit classes to allow different types of investors (individuals and institutions) to invest in the same fund. Different investment minimums and fees apply to different unit classes. A Class: for individuals and certain legal entities. B & D Class: retirement funds and other large institutional investors only. X Class: the special fee class that was made available to investors that were invested in the Dividend Income Feeder Fund. T Class: for investors in tax-free unit trusts. F Class: for Discretionary Fund Managers.

DISCLAIMER

Prudential Portfolio Managers Unit Trusts Ltd (Registration number: 1999/0524/06) is an approved CISC management company (#29). Assets are managed by Prudential Investment Managers (South Africa) (Pty) Ltd, which is an approved discretionary Financial Services Provider (#45199). The Trustee's/Custodian details are: Standard Bank of South Africa limited - Trustees Services & Investor Services, 20th Floor, Main Tower, Standard Bank Centre, Heerengracht, Cape Town.

Collective Investment Schemes (unit trusts) are generally medium-to long-term investments. Past performance is not necessarily a guide to future investment performance. Unit trust prices are calculated on a net asset value basis. This means the price is the total net market value of all assets of the unit trust fund divided by the total number of units of the fund. Any market movements - for example in share prices, bond prices, money market prices or currency fluctuations - relevant to the underlying assets of the fund may cause the value of the underlying assets to go up or down. As a result, the price of your units may go up or down. Unit trusts are traded at the ruling forward price of the day, meaning that transactions are processed during the day before you or the Manager know what the price at the end of the day will be. The price and therefore the number of units involved in the transaction are only known on the following day. The unit trust fund may borrow up to 10% of the fund value, and it may also lend any scrip (proof of ownership of an investment instrument) that it holds to earn additional income. A Prudential unit trust fund may consist of different fund classes that are subject to different fees and charges. Where applicable, the Manager will pay your financial adviser an agreed standard ongoing adviser fee, which is included in the overall costs of the fund. A Collective Investment Schemes (CIS) summary with all fees and maximum initial and ongoing adviser fees is available on our website. One can also obtain additional information on Prudential products on the Prudential website. The Fund may hold foreign securities including foreign CIS funds. As a result, the fund may face material risks. The volatility of the fund may be higher and the liquidity of the underlying securities may be restricted due to relative market sizes and market conditions. The fund's ability to settle securities and to repatriate investment income, capital or the proceeds of sales of securities may be adversely affected for multiple reasons including market conditions, macro-economic and political circumstances. Further, the return on the security may be affected (positively or negatively) by the difference in tax regimes between the domestic and foreign tax jurisdictions. The availability of market information and information on any underlying sub-funds may be delayed. The Manager may, at its discretion, close your chosen unit trust fund to new investors and to additional investments by existing investors to make sure that it is managed in accordance with its mandate. It may also stop your existing debit order investment. The Manager makes no guarantees as to the capital invested in the fund or the returns of the fund. Excessive withdrawals from the fund may place the fund under liquidity pressure and, in certain circumstances; a process of ring fencing withdrawal instructions may be followed. Fund prices are published daily on the Prudential website. These are also available upon request. The performance is calculated for the portfolio. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Purchase and repurchase requests must be received by the Manager by 13h30 (11h30 for the Money Market Fund) SA time each business day. All online purchase and repurchase transactions must be received by the Manager by 10h30 (for all Funds) SA time each business day.
